# FITC-Labeled Human MSLN/Mesothelin Protein

### Cat. No. MSL-HM280F

#### Description Recombinant FITC-Labeled Human MSLN/Mesothelin Protein is expressed from HEK293 with hFc tag at the C-Source Terminus. It contains Glu296-Gly580. Accession Q13421-2 The protein has a predicted MW of 59 kDa. Due to glycosylation, the protein migrates to 68-75 kDa based on Bis-Molecular Weight Tris PAGE result. Excitation Wavelength: 490 nm Wavelength Emission Wavelength: 520 nm Endotoxin Less than 1EU per µg by the LAL method. Purity > 95% as determined by Bis-Tris PAGE Formulation and Storage Lyophilized from 0.22 µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before Formulation lyophilization. Centrifuge the tube before opening. Reconstituting to a concentration more than 100 µg/ml is recommended. Reconstitution Dissolve the lyophilized protein in distilled water. -20 to -80°C for 12 months as supplied from date of receipt.-80°C for 3 months after reconstitution.Recommend Storage to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles. Background Mesothelin, also known as MSLN, is a protein that in humans is encoded by the MSLN gene. Cloning studies showed that the mesothelin gene encodes a precursor protein that is processed to yield mesothelin which is attached to the cell membrane by a glycophosphatidylinositol linkage and a 31-kDa shed fragment named megakaryocyte-potentiating factor (MPF). Although it has been proposed that mesothelin may be involved in cell adhesion, its biological function is not known.A knockout mouse line that lacks mesothelin reproduces and develops normally.

# **Assay Data**

# **Bis-Tris PAGE**

FITC-Labeled Human MSLN on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

# FITC-Labeled Human MSLN, hFc Tag ELISA

0.1µg FITC-Labeled Human MSLN, hFc Tag Per Well

Immobilized FITC-Labeled Human MSLN, hFc Tag at 1µg/ml (100µl/well) on the plate. Dose response curve for Biotinylated Human CA125, His Tag with the EC50 of 7.9ng/ml determined by ELISA (QC Test).

# FACS Data

FACS Analysis of Anti-MSLN CAR Expression. 293T cells were transfected with anti-MSLN-scFv and Fc tag. Cells were stained with 5µg/ml FITC-Labeled Human MSLN (296-580), Fc Tag and FITC-labeled protein control. Non-transfected 293T cells and FITC-labeled protein control were used as negative control.
